

DIGITAL TRANSFORMATION AND CONSULTING SERVICES

Driving Transformation to a Next-Generation, Technology-Enabled, Agile Digital Enterprise

Evolving missions, policy reforms, emerging national threats, changing workforce demographics, the move to cloud, and budgeting austerity increasingly demand that public sector IT solutions be nimble, efficient, integrable, and cost-effective. Yet, government agencies also need to fully support their stakeholders who expect highly personalized experiences and self-directed electronic transactions. Addressing these challenges requires rapid execution of modernization strategies that leverage cloud computing elastic networks, Agile development, and analytics platforms to accelerate innovation while optimizing costs.

Peraton's Digital Transformation and Consulting Services provide core services to drive digital strategies, manage capability acquisition, establish new business models, create new customer experiences, and optimize and automate processes that deliver the outcomes needed to transform the mission.

Our industry leading expertise coupled with the breadth of our unique intellectual property provides the key capabilities to guide organizations from idea to implementation.

BENEFITS

- 45+ years of government industry experience delivering transformation strategies and systems engineering
- Decades of experience supporting projects across the intelligence and defense industries
- Hundreds of successfully executed assessments and migrations
- 1,000+ Agile certifications leading delivery of Agile/DevOps/DevSecOps solutions across multiple agencies
- An extensive group of certified Technology Business Management (TBM) consultants

OUR APPROACH

We focus on driving digital transformation strategies to accelerate time to value and partner with you to optimize organizational processes and the applications that support them, to shift your IT spend from operations to innovation. We achieve this by improving mission agility and digitalization through assessment approaches and transformation roadmaps that drive innovation adoption strategies for cloud, AI, analytics, low-code/no-code, mobile, and Internet of Things. Our experts help you build and manage your IT portfolio to continually increase value to stakeholders and maximize your mission outcomes.

As we support the strategic initiatives on your transformation roadmap, our transformation strategies provide new opportunities to create value. We measure the success of these initiatives by establishing key metrics to govern your transformation and the return on your investment including specific results focused on:

- Reducing in total IT portfolio related spending by 15%-45%
- Improving productivity in time to value by 20%-50%
- Reallocating O&M spend to DME and innovation
- Increasing mission predictability and responsiveness by 40%-60%
- Improving customer satisfaction, deployment time of new functionality and innovation, alignment and ease of access to IT, and agility in conjunction with cost reduction
